

CHEMICAL FREE CLEANING

From Duplex Cleaning Machine director Murray McDonald, who has 25 years' chemical free cleaning experience, *5 Steps to Chemical Free Cleaning in Healthcare* aims to provide key knowledge and research on how to address anti-biotic resistant bugs and infection control. It has been written for infection control coordinators, directors of nursing and environmental services managers to help them shift from outdated mop, buck and chemical methods to a microbial

rather than visual clean. It contains tried and tested chemical free cleaning advice, research and case study example and implementation resources in a step-by-step format. RRP \$19.95.
